## **Questions and Answers:**

1. How many users will the phone system need to support?
  - a. We have about 120 staff members, volunteers, and interns but the number you probably need is equal to the number of phone extensions we currently support.
  - b. For extensions we have 65 assigned to users but have 95 plus or minus (some share) when you consider the staff themselves who have voice mail.
  - c. We are adding 2 sites
  
2. How many main switch boards are required (E-Rate will cover 1)? Note: 5 sophisticated Digital phone may be needed.
  - a. If we tie all 8 facilities (including the new sites) together with one switch board one is all we need. Otherwise we would need one at each facility. But as it is, only Admin and Shields have special phones with extra capacity. The others are simply set to ring at a certain desk first when the attendant is not on.
  
3. How many extensions are required (estimated)?
  - a. Voice mail would be 116 but physical extensions would be 65, plus the 2 new sites
  
4. How many Concurrent Phone Calls need to be maintained at any one time?
  - a. Each facility is equipped to handle 6 lines except Prospect which uses less.
  
5. How many new phones are required by type (1-X)? Describe the basic type or functionality (analog, digital, softphone, etc.)?
  - a. Each location has the need for a POT with standard phone for client use.
  - b. Shields will utilize Toshiba phones brought to the facility from our other locations to save money.
  - c. So we need 43-45 IP phones to cover the active phones. Additional phones may be needed at the 2 new locations.
  
6. How many hours of Voice Mail must be saved?
  - a. We have a new voice mail system that can be used with a variety of systems that has the capacity to store something like 5000 hours of voice. No need to replace, so the new system must be compatible.

Internal Connections include connections within, between or among instructional buildings that comprise a school campus, but do not include services that extend beyond the school campus. Components at TPC's site are eligible only if they are an essential element in the transmission of information within the school. The components must be necessary to transport information all the way to individual classrooms. Internal Connections do not include services that extend across a public right of-way beyond the school.

Using the provided requirements, specifications, and other information as needed, TPC is looking for Service Provider(s) to supply:

1. Labor, materials, tools, equipment and services for the installation and use of equipment as requested.
2. Completely coordinate with work of all other trades.
3. Supplementary or miscellaneous items, appurtenances and devices incidental to or necessary for a sound, secure and complete installation, whether or not specifically indicated in the Specification Documents.
4. Cabling pathways between equipment and buildings as needed, including conduit and/or trenching.
5. Weekly status reports on work progress.

Type of Installation: New Equipment

Installation Timeframe: FY14 (2011-12)

Installation Required: Yes

Type of Procurement: Purchase - final approval may be based upon receipt of a positive Funding Commitment Decision Letter and, or the governing board's approval.

All provided equipment lists are simply proposed to give service providers a better understanding of the project requirements. The District seeks a solution that is compatible with the existing network infrastructure. The proposed solution must provide functionality similar to the functionality of the equipment in provided equipment list. All components, connectors, couplers, jacks, panels, raceways, conduit, faceplates, wire managers, and patch cables necessary to transport information, cables to interconnect components, modules, licenses, and cable system costs must be provided in the response.

FCC rules require that an applicant sign a contract with the service provider before signing and submitting a completed *Services Ordered and Certification Form (Form 471)*.

Consequently, all Contracts, Statements, of Work, and/or Service Agreements must be submitted with this response with a handwritten signature and date. Countersigned documents may be provided after the Funding Commitment Decision Letters are issued by the Schools and Libraries Division of the Universal Services Administrative Company.

## Priority 2 Internal Connections – Basic Maintenance

Internal Connections are components located at TPC's site that are necessary to transport information to classrooms and to eligible administrative areas or buildings. Internal Connections include connections within, between or among instructional buildings that comprise a school campus, but do not include services that extend beyond the school campus. Components at TPC's site are eligible only if they are an essential element in the transmission of information within the school. The components must be necessary to transport information all the way to individual classrooms. Internal Connections do not include services that extend across a public right of-way beyond the school.

Basic maintenance services are defined as follows: "but for the maintenance at issue, the connection would not function and serve its intended purpose with the degree of reliability ordinarily provided in the marketplace to entities receiving such services without E-rate discounts." Please provide a Basic Maintenance Contract to perform the following tasks on the equipment listed below:

1. Repair and upkeep of eligible hardware
2. Wire and cable maintenance
3. Basic technical support
4. Configuration changes

**Bidder's Basic Maintenance Agreement must contain the Location, Product, and Make / Model number of the equipment to be covered by the proposed Basic Maintenance Contract (note the table below). This table (or a similar table with like data) must be included in with the Bidder's Basic Maintenance Agreement:**

Location Deployed	Product / Service to be Covered	Make/Model Number

**Note: The above worksheet is available for download – please visit: [http://adsadsi.com/rfp\\_year\\_14.shtml](http://adsadsi.com/rfp_year_14.shtml).**

In the FCC's *Sixth Report and Order* ([FCC 10-175](#)), the FCC included the following information on unbundled warranties and Basic Maintenance of Internal Connections (BMIC):

- We find that an unbundled warranty is an ineligible BMIC service because it is purchased as a type of retainer and not as an actual maintenance service. That is, BMIC contracts that require an upfront payment and that payment is required regardless of whether any service is actually performed are not eligible.
- ...if applicants are able to estimate a certain number of hours per year for maintenance, based on the current life of their equipment and a history of needed repairs and upkeep, they may seek E-rate funds for upfront costs on service contracts designed to cover this estimate of repairs and upkeep. Reimbursements will be paid on the actual work performed and hours used only. For example, if a school determines it will need 30 service hours in a given year to maintain its internal connections but uses only 20 hours, the school will be reimbursed only for 20 hours even if they were approved for E-rate funds on 30 hours.

The *Sixth Report and Order* deems unbundled warranties ineligible for support beginning with FY2011. Applicants cannot simply cost-allocate out the ineligible portion because the Commission's rules do not allow applicants to receive support for services in a basic maintenance contract that contains both eligible and ineligible services. See paragraph 24 of the *Third Report and Order*, CC Docket No. 02-6, [FCC 03-323](#) (2003).

Software downloads, bug fixes, and access to a technical assistance center may be eligible.

**Bundled warranties may be eligible for E-rate discounts.**

**For additional information on the changes to the eligibility of basic maintenance contracts and other changes to the E-rate program for FY2011, you can refer to the following documents:**

- *Sixth Report and Order* ([FCC 10-175](#))
- Order [DA 10-2355](#), clarifying the eligibility of basic maintenance and the new E-rate gift rules adopted in the Sixth Report and Order
- Public Notice [DA 10-2356](#), providing further guidance to E-rate participants, listing effective dates of the proposals adopted in the Sixth Report and Order, and answering Frequently Asked Questions (FAQs).
- *Third Report and Order* ([FCC 03-323](#))

**Please make sure any required Contracts or Statements of Work are authorized and included in your response.**

**Basic Maintenance for Proposed New Equipment:**

**Proposals for Basic Maintenance of new and existing equipment may be combined into one support document.**

Maintenance Logs are required to be kept by the service provider and sent to school quarterly (please include a sample log).

Please note: The following products and services **are NOT eligible**:

1. On-site technical support (*i.e.*, contractor duty station at the applicant site) when off-site technical support can provide basic maintenance on an as-needed basis.
2. Services such as network management and 24-hour network monitoring.
3. Help desks that provide a comprehensive level of support beyond basic maintenance of only eligible components.
4. Technical support contracts that are more than basic maintenance.
5. End User Equipment (PCs and Phones).

Eligible basic maintenance does not include services to maintain ineligible equipment, to enhance the utility of equipment beyond the transport of information, or to provide diagnostic services in excess of those necessary to maintain the equipment's ability to transport information.

Required: Manufacturer Authorized Basic Maintenance for all listed Equipment with an optional block of hours (labor contract) for general Basic Maintenance on proposed Equipment

Note: Minimum of 10 hours per month is requested on the labor contracts, additional hours per month shall be considered.

Note: Multiple contracts (for separate and distinct services) may be awarded.
