The Contract may be modified only through a Contract Amendment within the scope of the Contract signed by the Purchasing Manager. If either party is delayed at any time in the progress of the work by force majeure, the delayed party shall notify the other party in writing of such delay, as soon as is practicable and no later than the following working day, of the commencement thereof and shall specify the causes of such delay in such notice. Such notice shall be delivered or mailed certified-return receipt requested, and shall make a specific reference to this article, thereby invoking its provisions. The delayed party shall cause such delay to cease as soon as practicable and shall notify the other party in writing when it has done so. The time of completion shall be extended by Contract Amendment for a period of time equal to the time that results or effects of such delay prevent the delayed party from performing in accordance with this Contract.

Any delay or failure in performance by either party hereto shall not constitute default hereunder or give rise to any claim for damages or loss of anticipated profits if, and to the extent that such delay or failure is caused by force majeure.

GPSOA may, at any time, by written order to the Contractor, require the Contractor to stop all or any part, of the work called for by this Contract for a period of up to ninety (90) days after the order is delivered to the Contractor, and for any further period to which the parties may agree. GPSOA, located in Onarga, IL is currently seeking a new Voice Over IP phone system to meet the needs of our expanding organization. This Request For Proposal is under the guidelines of USAC's E-rate program for Schools and Libraries.

Phone System

Currently GPSOA has a two node Cisco CUCM, software version 6.1.5. The servers are over 4 years old and one has been particularly problematic. We are seeking a replacement solution so we can upgrade the underlying infrastructure while maintaining our current endpoints and messaging solution.

The PBX should be licensed to initially support 175 users and allow growth to 250-300 users. Vendor shall provide pricing to convert existing licensing up to current standards and any additional licensing required to meet the 175 user threshold. The system should support at least two PRI connections. Vendor will determine suitability of existing gateway router and suggest expansion/upgrade/replacement options.

The system should be Fault Tolerant so that it can provide load balancing/failover service to the handsets if a critical system node fails.

The system shall provide at least four (4) user-manageable auto attendants and all proper licenses to include a configuration manager.

FEATURES TO INCLUDE

Multiple Conference Bridges: Multiple bridges would allow our teams to facilitate simultaneous, independent conference calls. Up to 10 bridges.

Fax Solutions: Please break-out options and licensing requirements that facilitate fax-on-demand, integrated fax mail, and desktop client applications.

Unified Messaging: For both desk and mobile users. The system must deliver voice mail to existing E-Mail system.

OTHER DELIVERABLES

E911 Integration The ability to program caller ID (CID) on extensions for emergency services that would supersede the normal CID - the ability to add/change the physical address of extensions so that emergency responders receive the correct physical building address for a multi-building campus.

Voice Quality: The proposed solution should provide for quality, high fidelity, voice communications.

System Administration: The proposed solution should provide a single point of management from any point on the network for all components. The proposed solution should provide for maximum flexibility for rapid, efficient, and cost-effective configuration changes to user profiles and IP telephone equipment through a standard browser-based interface.

LAN CONNECTIVITY

The proposed system should support and be certified to work with any Ethernet switch or router from any vendor.

TCP/IP transport over existing data network to meet further requirements below

- PoE support
- Support for separate telephone VLAN

HAND SETS

Up to 15 ATAs

Up to 25 Licenses for soft phones

TRAINING - Training for system operation and maintenance at time of installation.

Priority 2 Internal Connections – Basic Maintenance

Internal Connections are components located at GPSOA’s site that are necessary to transport information to classrooms and to eligible administrative areas or buildings. Internal Connections include connections within, between or among instructional buildings that comprise a school campus, but do not include services that extend beyond the school campus. Components at GPSOA’s site are eligible only if they are an essential element in the transmission of information within the school. The components must be necessary to transport information all the way to individual classrooms. Internal Connections do not include services that extend across a public right of-way beyond the school.

Basic maintenance services are defined as follows: “but for the maintenance at issue, the connection would not function and serve its intended purpose with the degree of reliability ordinarily provided in the marketplace to entities receiving such services without E-rate discounts.” Please provide a Basic Maintenance Contract to perform the following tasks on the equipment listed below:

1. Repair and upkeep of eligible hardware
2. Wire and cable maintenance
3. Basic technical support
4. Configuration changes

Bidder’s Basic Maintenance Agreement must contain the Location, Product, and Make / Model number of the equipment to be covered by the proposed Basic Maintenance Contract (note the table below). This table (or a similar table with like data) must be included in with the Bidder’s Basic Maintenance Agreement:

Location Deployed	Product / Service to be Covered	Make/Model Number

In the FCC’s *Sixth Report and Order* (FCC 10-175), the FCC included the following information on unbundled warranties and Basic Maintenance of Internal Connections (“BMIC”):

- We find that an unbundled warranty is an ineligible BMIC service because it is purchased as a type of retainer and not as an actual maintenance service. That is, BMIC contracts that require an upfront payment and that payment is required regardless of whether any service is actually performed are not eligible.
- ...if applicants are able to estimate a certain number of hours per year for maintenance, based on the current life of their equipment and a history of needed repairs and upkeep, they may seek E-rate funds for upfront costs on service contracts designed to cover this estimate of repairs and upkeep. Reimbursements will be paid on the actual work performed and hours used only. For example, if a school determines it will need 30 service hours in a given year to maintain its internal connections but uses only 20 hours, the school will be reimbursed only for 20 hours even if they were approved for E-rate funds on 30 hours.

The *Sixth Report and Order* deems unbundled warranties ineligible for support beginning with Funding Year 2011. Applicants cannot simply cost-allocate out the ineligible portion because the Commission’s rules do not allow applicants to receive support for services in a basic maintenance contract that contains both eligible and ineligible services. See paragraph 24 of the *Third Report and Order*, CC Docket No. 02-6, FCC 03-323 (2003).

Software downloads, bug fixes, and access to a technical assistance center may be eligible.

For additional information on the changes to the eligibility of basic maintenance contracts and other changes to the E-rate program you can refer to the following documents:

- *Sixth Report and Order* (FCC 10-175)
- Order DA 10-2355, clarifying the eligibility of basic maintenance and the new E-rate gift rules adopted in the Sixth Report and Order

- Public Notice DA 10-2356, providing further guidance to E-rate participants, listing effective dates of the proposals adopted in the Sixth Report and Order, and answering Frequently Asked Questions (FAQs).
- *Third Report and Order* (FCC 03-323)

Please make sure any required Contracts or Statements of Work are authorized and included in your response.

Maintenance Logs are required to be kept by the service provider and sent to school quarterly (please include a sample log).

Please note: The following products and services **are NOT eligible (Equipment not eligible for E-Rate reimbursement shall not be covered under this agreement):**
